

To Whom It May Concern,

There should be no distinction between the rights and freedoms given to one method of broadcasting vs. another, most especially one that is a paid service who's subscribers have come to enjoy the content they expect. Satellite radio is most certainly and evolutionary step above traditional radio broadcast, and should not be limited or infringed by a elderly media unable to adapt or offer equal service. The ability to receive up to the minute traffic and weather information via my XM radio is invaluable to me. To force XM to remove it in favor of the far inferior service offered by regular radio would be a disservice, and also flatly in contradiction to your responsibility to uphold the freedoms vouchsafed all forms of communication by our Constitution.

Sincerely,

Michael R. Slater
